EARTH SERVICES

EXCAVATION - ENVIRONMENTAL - DEMOLITION

About Earth Services

RCRA, INC doing business as Earth Services is a specialized contracting company providing environmental field services, excavation contracting, and demolition services. Earth Services is RCRA, INC's only line of business and is focused upon providing contractor type field services only. While members of Earth Services' roster are capable and trained in project management, consulting, and engineering, we feel that a dedicated contracting corporation can provide premium services to our clients.

Management Personnel

Josh Appleton – Operations Manager -Corporate Director

Mr. Appleton holds an M.S. in Environmental Management from Samford University, Birmingham, AL, and a B.S. in Environmental Science from Stetson University in Deland, FL. Mr. Appleton specializes in environmental remediation and engineering, risk assessment and management, and fate and transport of hazardous chemicals.

Prior years of experience include environmental compliance, project management, and diverse general contracting with recent projects in site remediation, demolition/salvage and disaster recovery/debris management. Mr. Appleton has managed numerous LUST, Superfund, and Brownfields projects throughout the country. Previously, Mr. Appleton worked with the U.S. Army Corps of Engineers in Environmental Management and Natural Resource Management.

Peter Klus – Operations Manager – Corporate Director

Mr. Klus currently manages multiple field crews running our diverse operations, estimating jobs as well as corporate management. Additionally, he trains heavy equipment operators and occasionally takes the seat of a high reach excavator on a difficult job. He has years of experience as a field superintendent managing environmental remediation projects, large-scale demolition operations, and general contracting/construction sites. He has personally managed soil cleanups in excess of 250,000 thousand tons of contaminated soil removal as well as tank removal operations, site investigations, and emergency cleanups. Prior to environmental and demolition work, Mr. Klus worked as foreman of a site preparation and excavating company operating throughout the Midwest.

Tom Emling – Chief Financial Officer

Mr. Emling is a Certified Public Accountant (CPA) with a B.S. in Accounting from Southern Illinois University, Carbondale, IL and was a Certified Landfill Manager in the State of Illinois. Mr. Emling has over 20 years of experience in the waste and disposal industry in both private and public companies. Mr. Emling has served as both a division controller and division manager for a Fortune 500 Waste industry company along with experience with landfill management, special waste, and asbestos handling and disposal, municipal solid waste, recycling& C&D pickup, transportation and disposal. Previous experience includes, Management of a Sand Mining/Production facility, Vice President of a bank, Public Accounting experience along with owning an operating a multi-million-dollar waste/recycling pickup and disposal company. Mr. Emling has worked closely with the State of Illinois EPA, MSHA and other regulatory agencies.

Marvin Johnson – Business Development Manager

Mr. Johnson is a graduate of Eastern IL University with a BS in Environmental Biology. Mr. Johnson has over 20 years of experience as an environmental consultant working with the Illinois EPA and State Fire Marshal as well as commercial property owners on an array of environmental compliance issues. Mr. Johnson specializes in Underground Storage Tank spill response and cleanup, as well as completion of OSFM Site Assessments and IEPA reporting. Mr. Johnson is 40-hour HAZWOPER certified, is Licensed by ICC in UST decommissioning and is an IDPH Licensed Asbestos Inspector

Field Crews

Earth Services employs a highly experienced field crew, every member being 40 Hour OSHA Hazwopper certified. Laborers, drill operators, truck drivers, and heavy equipment operators with years of experience in site investigation, demolition, excavation, soil remediation, and emergency response are employed and on call for services throughout the country. Additional resumes and/or work history of key field staff can be provided upon request.
